## GROUNDED AND DOWN-TO-EARTH

RAW ELEMENTS journeys to the depths of the Earth's crust from where all treasures spring. Dark and muted earth tones blend into dazzling gemstone hues transforming spaces forever. Flooring is more textured, reflecting the naturally occurring patterns seen in sedimentary and igneous rocks. The collection also works beautifully when used in conjunction with Signature's other flooring products – crafting spaces that feel high on form and function.

BEDROCK is the crust and cradle of nature's infinite underground riches. Think hard wearing, long lasting but also neutral and calming. The base from where all design inspiration flows.

The many shades of BEDROCK. Bold, earth-hued gradient flooring for bespoke style and contemporary flair. A textured and warm aesthetic to imbue commercial spaces with comfort and style.

Whether calming or bold – GEMSTONE's hues intermingle effortlessly with the more earthy, neutral shades of basalt. The result: Sophisticated yet adaptable flooring to invigorate commercial spaces.

Take inspiration from the meandering hues of ametrine, celestite and angelite. GEMSTONE shale features soft pastel tones that combine for directional ease and exquisitely modern spaces.

Get creative with GEMSTONE.  
Work with different base colours  
to create unified yet distinctively  
zoned spaces. A stunning  
metamorphosis, indeed.

A veritable  
treasure trove  
of colour...
